DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, drawn to a method of manufacturing a semiconductor device, classified in class 438, subclass 149.
 - II. Claims 14-16, drawn to a semiconductor device, classified in class 257, subclass 350.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product of group II could be manufactured by a materially different process that could include forming and patterning a first conductive layer to form a first and second gate electrode structures, forming a masking layer over a second area of the substrate where the second electrode structure is located, implanting a first impurity in the first region, removing the first masking layer over the second area, and forming a second masking layer over the first area, and implanting a second impurity in the second region.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
